## USING YOUR CONTROLS

---

1. **LEFT CONTROLLER:** hold it with the Red Button to your upper left (toward the TV).
2. **CONTROL STICK:** Push the Control Stick left or right to make Mario run. Position Mario under or over a ladder and push the Control Stick up or down to make Mario climb.
3. **RED BUTTON:** Press the Red Button to start each new screen and to make Mario jump to avoid barrels or fireballs or to grab the hammer. Jumping barrels or fireballs is easiest when Mario and the barrels are moving toward each other.

---

## HERE'S HOW TO PLAY

---

### STEP 1: Get started!

To start a game immediately after turning on your Video Computer System™, just press the Red Button on your controller. To play another game, press **Game Reset**.

To activate Mario and start action, press the Red Button.

### STEP 2: Making it to the top.

When the first of your three Marios appears on the ramps, try to get him to the top to save his girlfriend. If Mario is hit by a barrel, he is eliminated. Climb the unbroken ladders to reach the next ramp! Mario cannot climb broken ladders.

### STEP 3: Hammer away!

If Mario jumps up and grabs the hammer, he can face the barrels and hit them for extra points. But if the hammer misses and the barrel hits Mario, he's eliminated! And remember — he can't climb ladders with the hammer, and the hammer disappears in a few seconds.

### STEP 4: How time flies . . .

The Score/Bonus Indicator shows your bonus "counting down." Watch out! If it reaches zero, Mario is eliminated!

## STEP 5: Success or failure?

If you make it to the top of the ramps, the remaining bonus is added to your score and you move on to the rivet screen. But if you fail, Mario is eliminated.

## STEP 6: A riveting mission.

Mario must remove all the rivets to save his girlfriend. To remove a rivet, Mario runs or jumps over it — and it disappears!

## STEP 7: Playing with fire.

Jump over fireballs for points — or avoid them. (Remember, the fireballs are following Mario — and they're tricky! Fireballs always stay on the same ramps, but sometimes jump across the gaps.)

## **STEP 8: Hurrah!**

When you have removed all the rivets, the game continues to alternate between the two screens — but the action gets harder as you go! Keep playing until you run out of Marios.

### **SCORING**

While you control Mario, the Score/Bonus Indicator shows your bonus counting down. Between screens and at game end, your score is displayed.

Starting Bonus Value (each screen):	5000 points
Jumping a barrel or fireball:	100 points
Eliminating a rivet:	100 points
Smashing a barrel or fireball:	800 points

The player receives three Marios per game.
